

The quietest helicopter flying today

The revolutionary McDonald Douglas MD-520N NOTAR helicopter reduces noise by harnessing air flow to replace the mechanics of the traditional tail rotor

NOTAR (No Tail Rotor) MD-520N

Top speed: 175mph, ceiling 14,175ft

Range: 250 miles

Conventional helicopter uses tail rotor to counteract 'torque' effect which tries to turn aircraft around axis of main rotor
