

Iraq's weapons – Multiple rocket launcher

The most widespread rocket in Iraq's inventory is the 122mm, based on the Russian BM-21 design. Iraq is believed to have around 200 MRLs with warheads including high-explosive, incendiary, and possible sarin chemical warfare variants – banned by the United Nations following the 1991 Gulf War

Can fire salvo of
40 rockets in 20 secs

Rocket tubes
