

Discovery 3 – dynamic off-road performer

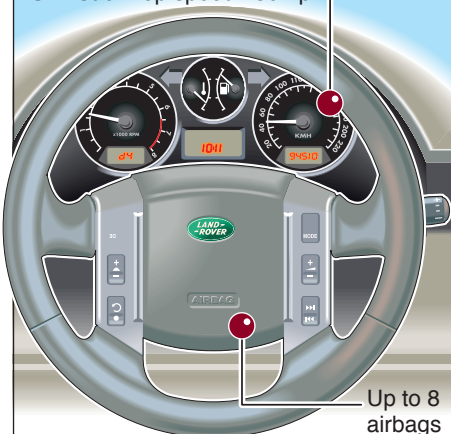

Land Rover's LR3 is an all-new, permanent four-wheel drive SUV, packed with technology. A computer-controlled Terrain Response system, voice recognition for basic navigation instructions, and 300-watt stereo system are protected by an aluminium, magnesium and Boron steel bodyframe

On-road: Top speed 130mph

GPS navigation with off-road capability. Screen also shows traction settings

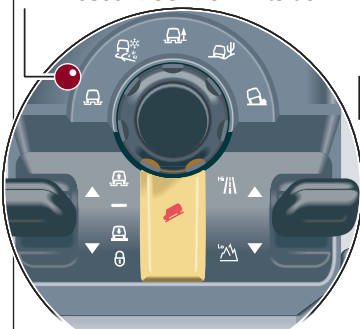

Six-disc CD changer

Bluetooth cellphone

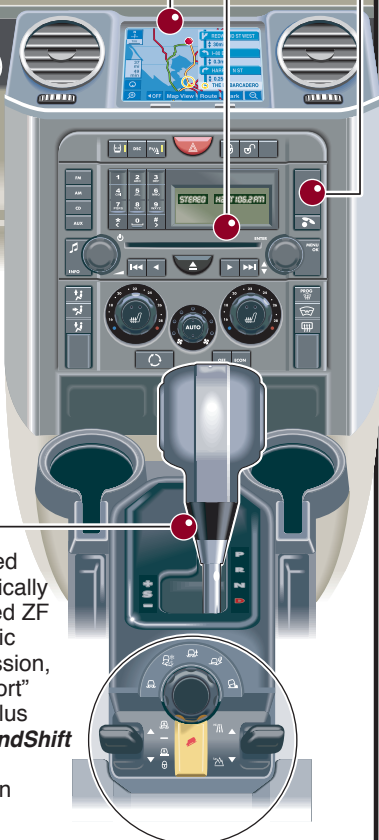

Up to 8 airbags

Terrain Response: Five terrain settings – *general driving, grass/gravel/snow, mud and ruts, sand, and rock crawl*. Computer controls ride height, engine power, transmission, and differential settings; **Hill Descent Control** limits downhill speed

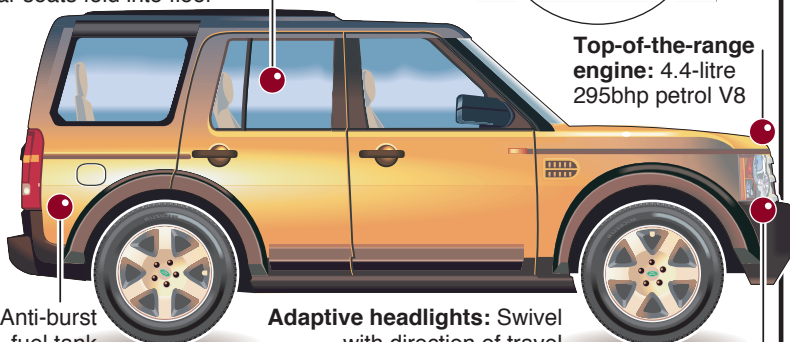

Five or seven seats – all rear seats fold into floor

Six-speed electronically controlled ZF automatic transmission, with "sport" mode, plus **CommandShift** manual operation

Top-of-the-range engine: 4.4-litre 295bhp petrol V8

Anti-burst fuel tank

Adaptive headlights: Swivel with direction of travel
