

U.S. hints at a new Iran battlefront

The weapon at the heart of the Bush administration's controversial plans for a military attack against Iran's underground nuclear facilities is the B61-11 nuclear bunker-buster. Critics say these so-called tactical nuclear devices are Weapons of Mass Destruction which would inflict massive civilian casualties

B61-11: U.S. has 41 of these nuclear weapons of which 20 are ready for use
