

# Israeli "bunker-busting" bombs

Israeli aircraft mounting raids in Lebanon are believed to have at their disposal a range of "bunker buster" bombs which could be used to strike at Hezbollah command bunkers and underground weapons storage sites

## **PB-500 A1**

*Israel Military Industries*

Length (approx.): **3.0m**

Weight: **500kg**

Penetration: **2.0m concrete**

## **BLU-109 warhead**

240kg high explosive

Laser target  
seeker

Computer-controlled  
moveable flight fins

## **GBU-27**

*U.S.-made*

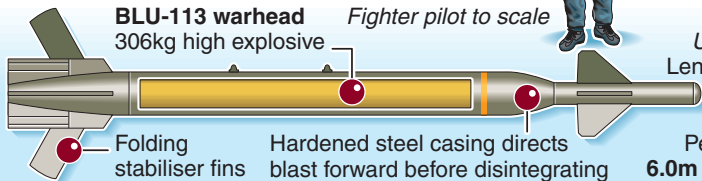

Length: **4.2m**

Weight

**984kg**

Penetration

**1.8m concrete**

## **BLU-113 warhead**

306kg high explosive

*Fighter pilot to scale*

Folding  
stabiliser fins

Hardened steel casing directs  
blast forward before disintegrating

## **GBU-28**

*U.S.-made*

Length: **5.8m**

Weight

**2,130kg**

Penetration

**6.0m concrete**
