

Bluetec offers clean machines to U.S.

German automakers Audi, BMW, Mercedes-Benz and Volkswagen have formed an alliance to use the Bluetec emissions treatment system on diesel vehicles sold in the United States. The new breed of green diesels has been made possible by the introduction of ultra-low-sulphur diesel

Projected diesel vehicle sales in U.S.

Ultra-low-sulphur diesel eliminates 97% of sulphur in fuel

AdBlue: BlueTec uses water-based urea additive, stored in separate small tank. Urea generates ammonia – required for **Selective catalytic reduction (SCR)** process
