

Tech-packed luxury Lexus

Designed to match the luxury found in a private jet, the Lexus LS 460 is powered by an all-new advanced 4.6-litre V8 engine combined with the world's first eight-speed automatic transmission. The LS, which features voice-activated systems and radar cruise control, can even park itself

Rear passengers enjoy reclining seats with adjustable footrest, built-in massager and high-res DVD

Four-zone rear air-conditioning

Wheelbase: 2,969mm or 3,091mm

Advanced Parking Guidance System

1. Drive slowly past parking spot

3. Click parking button

2. Put car into reverse gear. Front and rear sonar sensors detect gap
