

Apple's iPhone goes on sale

Apple's eagerly awaited iPhone finally hits the streets this summer. The \$500 device uses a single button and large touch screen to navigate between playing songs and videos, displaying pictures, surfing the internet, instant messaging or making phone calls

Apple iPhone: 61mm x 115mm x 11.6mm thick

Communication: Quad-band GSM, GPRS, Wi-Fi and Bluetooth

Screen: 90mm, 320 x 480 pixel touch-sensitive TFT LCD display

"Multi-touch" screen: Replaces keypad with revolutionary interface using simple finger gestures

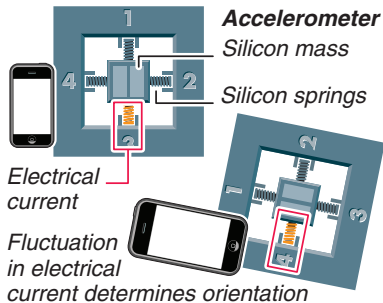

1 Tap: Select on-screen controls

2 Flick: Scroll down screen

3 Pinch: Zoom in and out, expand image

Ambient light sensor: Adapts display brightness for clarity and power efficiency

Orientation: When phone is rotated display aspect automatically changes from portrait to widescreen landscape

Applications: Fully multi-tasking – download email, listen to music and surf the web all at the same time

Phone: Includes conference calls, Visual Voicemail to play voice messages in any order

Photos: 2.0 megapixel camera and innovative photo album

iPod: Play music and video, scroll through widescreen album cover art

Web: Safari web browser. Third-party "Web 2.0" applications supported
