

# DBS packs power, beauty and soul

Aston Martin's DBS, its latest supercar, is a race-bred, two-seater shaped by the aerodynamic demands of high performance driving

**Body panels:** Crafted from aluminium and ultra-light carbon-fibre

**Powerplant:** 6.0-litre, V12 engine – also used in sibling DBR9-S race cars – delivers 510bhp at 6,500rpm

Wheelbase: 2,740mm

**Weight distribution:** Front-mid mounted engine and rear-mid mounted transaxle ensures 85% of car's weight is positioned within wheelbase

Racing style anti-clockwise rev counter

**Central console:** Simple buttons and silver-plated clock
