

Rinspeed fine-tunes Fiat's popular minicar

Rinspeed's Fiat 500 E2 gives the driver a choice of two power levels, its 60hp "Commuting" mode – suitable for city traffic – or, at the touch of a button, a muscular 160hp "Highway" mode for the open road

Transmission:

Five-speed manual, front-wheel drive

Engine: 1,368cc, 4 cylinder petrol, 16 valves

Wheelbase: 2,300mm

Instrument pod: Features concentric speedo and tachometer needles which chase each other around dial

Gear shift indicator

Power button: Alters engine electronics, allowing choice of **Commuting** or **Highway** modes

Fuel consumption

Commuting mode:

4 litres per 100km

Highway mode:

7 litres per 100km
