

# New Astra packs innovative technologies

The all-new Astra features a mechatronic chassis which responds to changing road conditions, FlexRide suspension which adapts to driving style and cornering speed, and a camera which can read traffic signs

**FlexRide:** Switches between *Sport*, *Tour* and *Normal* modes

*Sport*

*Tour*

Instrument pods angled towards driver's eyeline

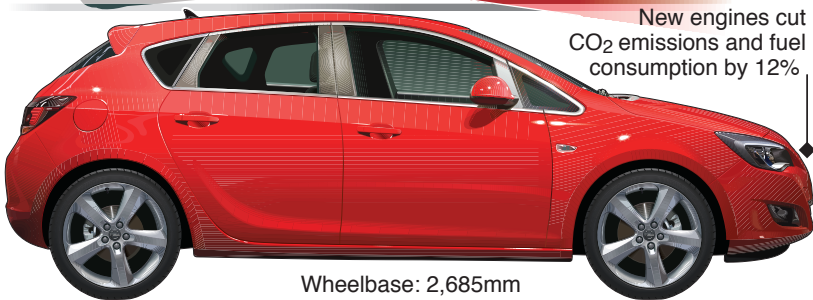

**Opel Eye:** Recognizes speed limit and no-passing signs and displays them on instrument panel. Warns driver if car departs from its lane

Camera takes 30 pictures/second

New engines cut CO<sub>2</sub> emissions and fuel consumption by 12%

Wheelbase: 2,685mm
