

# Renault Fluence charging into the future

Renault's range of zero-emission electric vehicles (EVs) will launch in 2011 with an all-electric version of the Fluence family sedan. Key to its success will be the deployment of a unique battery recharging and exchange infrastructure to alleviate the "range anxiety" associated with EVs

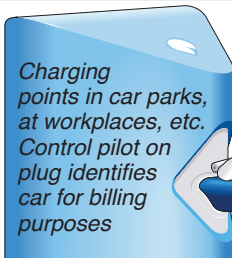

## FAST CHARGE

At dedicated charging stations with three-phase, 400v sockets up to 63A

**New European standard electric vehicle charging plug for single and three-phase connections**

"Plug-present" safety contact

Control pilot for data exchange

**00:20**

## STANDARD RECHARGE

Plug in to standard single-phase, 230v socket at home or office
