

Nissan Leaf built in UK

Nissan will begin building its Leaf zero-emission electric car at its Sunderland plant from early 2013, making Britain its third production site after Japan and the U.S.

■ **Leaf:** Medium-sized, five-seat hatchback EV

■ **Battery:** Lithium ion cells power 80kW electric motor

■ **Range:** 160km; top speed, 140km/h

■ **Charge time:** 8 hours using 200V outlet or up to 80% charge in under 30 minutes using DC 50kW charger

■ **Price:** Competitive with similar-sized car with conventional engine (\$30,000), excluding price of batteries (\$10,000), which will likely be leased
