

Jumbo jet gets makeover to challenge A380

More than 40 years after its first commercial flight, the Boeing 747-8 features efficient new engines and an all-new wing, designed to reduce drag, improve performance, and attract customers away from the Airbus A380

New 747-8I Intercontinental is stretched version of 747-400 model, 5.6 metres longer, providing 467 seats in three-class configuration

Range:	747-8I: 14,815km	A380: 15,200km
Passengers:	467	550
Length:	76.26m	72.75m
Price:	\$293m	\$337m

Since its first commercial flight in 1970, Boeing's 747 fleet has flown 77.8 billion km and carried 3.5 billion people
