

Apple leaps forward with new iPhone

Apple's latest smartphone, the *iPhone 4*, is being billed as the thinnest ever, boasting all-new design, longer battery life, video calling and the highest resolution screen ever built into a mobile phone

► **Design:** Stainless steel band around edge of handset doubles as phone's antenna. Scratch-resistant glass front and back

► **Screen:** "*Retina Display*" of 326ppi – four times more than iPhone 3GS – with 800:1 contrast ratio. In-plane switching (IPS) allows wide viewing angles

► **Camera:** Five megapixels, with tap-to-focus, LED flash, 5X digital zoom and capture / edit of HD video. Second front-facing camera enables video calls via WiFi to other iPhone 4 users

► **Connectivity:** Offers 802.11n WiFi networking, quad-band 3G HSDPA (up to 7.2Mbps), GPS and Bluetooth

► **Operating system:** New *iOS 4* has over 100 features – including multitasking, folders, improved email, *iBooks* support and *iAds* advertising initiative
