

# Dreamliner makes first international flight

Boeing's long-anticipated 787 Dreamliner is spacious, almost silent and boasts design features that promise to make jetlag and airsickness a thing of the past. The 787 uses 20% less fuel than a similarly sized airplane, and cruises at Mach 0.85 (1,040km/h)

## Dreamliner family

| 787-3                  | 787-8                  | 787-9                  |
|------------------------|------------------------|------------------------|
| Seats: 290 (2 classes) | Seats: 250 (3 classes) | Seats: 290 (3 classes) |
| Range: 4,650-5,650km   | Range: 14,200-15,200km | Range: 14,800-15,750km |
| Price: \$150.0-155.5m  | Price: \$161.0-171.5m  | Price: \$194.0-205.5m  |
