

Japan to restart nuclear plants

Japan is planning to restart the first nuclear power station since the Fukushima disaster. With all but three of the country's 54 power plants currently offline for safety checks, the government is keen to avoid serious power shortages during peak demand in the summer

Nuclear power plants Capacity (GWe)

 Reactors in operation	3.14
 Offline for safety checks	29.83
 Closed due to tsunami	15.99

Total electricity generating capacity* (GWe)
