

UN nuclear agency reports failed Iran talks

The UN nuclear agency has ended its latest mission to Iran after IAEA inspectors were barred from accessing the Parchin site 30km southeast of Tehran where nuclear weapons are believed to be in development

PARCHIN MILITARY COMPLEX

KEY NUCLEAR SITES

1 Natanz: Main uranium enrichment plant. Iran recently unveiled new centrifuges to speed up enrichment

2 Fordow: Underground enrichment facility near city of Qom, identified by Western intelligence in 2009

3 Arak: Heavy water reactor under construction, due online by 2013

4 Esfahan: Uranium conversion and fuel fabrication plant

5 Bushehr: Iran's first nuclear power plant, opened September 2011

6 Darkhovin: Nuclear reactor under construction, scheduled to open in 2016

7 Ardakan: Plant for processing uranium ore into yellowcake, possibly not yet operational
