

# Russia to give S-300 missiles to Syria

Russia's S-300 surface-to-air missile system is designed to intercept aircraft as well as engage ballistic missiles in a similar way to the Patriot system that NATO has deployed on Turkey's border with Syria

**S-300PM surface-to-air missile system.** NATO name: *Grumble*

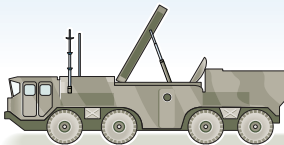

Length: 7.5m. Range: 150km. Speed: Mach 6 (2,000m/sec)

Russia claims kill probability of 80% to 93% for aircraft at up to 27,000m altitude, up to 85% for missiles

"Flap Lid" engagement radar

Command centre: Can engage six targets simultaneously

Launcher with four missiles.  
Up to eight launchers in S-300 battery
