

# Egypt's chance to resuscitate economy

The appointment of a technocratic government could give Egypt its best chance since the 2011 revolution to strengthen an economy faced with falling cash reserves and rising debt, unemployment and inflation

## FOREIGN CURRENCY RESERVES Reserves down 56% since ousting of President Hosni Mubarak...

## GOVERNMENT EXPENDITURE ...petrol and gas subsidies amount to a fifth of government costs

## UNEMPLOYMENT (%) Job losses increase as foreign investment dries up...

## INFLATION (%) ...while rising food prices are again fuelling unrest
