

Future iPhone: the shape of things to come

Apple is developing new designs with bigger screens incorporating curved glass and enhanced pressure-sensitive touch technology

Apple under pressure to offer greater variety of screen sizes, like hugely popular rival Samsung

Visible bezel around screen edge

▲ **Current:** iPhone 5c ▲ **Speculated:** Larger "iPhone 6" designs

iPhone Pressure-Sensing Screen

Gorilla glass outer

Touch sensor layers

Glass substrate

New spring membrane to detect force of touch

Retina display screen
