

Global carbon emissions reach new record high

Spurred chiefly by China, the United States and India, the world spewed far more carbon pollution into the air in 2013 than ever before, according to scientists, as more than 100 world leaders gather at the UN Climate Summit in New York to discuss how to reduce heat-trapping gases

TOP CARBON EMITTERS: Ranked by 2013 emissions (figures in million tonnes of CO₂) ■ 2013 ■ 1993

GLOBAL CO₂ EMISSIONS: 2013 (MtCO₂)

2013
world total
36.1bn tonnes
(2.3 percent
increase
on 2012)
