

Fast-Track drive to end AIDS epidemic by 2030

UNAIDS has set a target to end the AIDS epidemic as a global health threat by 2030. The upward trajectory of the epidemic has been broken and ambitious targets aim to cut new HIV infections by 28 million and AIDS-related deaths by 21 million over the next 15 years

ESTIMATED ANNUAL NUMBER OF NEW HIV INFECTIONS AND AIDS-RELATED DEATHS (low to middle income countries, by region)
