

Syria developing new nuclear facility?

New intelligence suggests that Syrian President Bashar Al-Assad could be covertly building a new underground nuclear complex near the Lebanese border, aided by Iran and North Korea

SATELLITE IMAGE

2008-2009: Construction begins on site believed to house nuclear reactor, enrichment facility and around 8,000 fuel rods

Sep 5, 2007: Seven Israeli F-15 fighter bombers destroy *Kibar* facility – believed to be developing nuclear weapons

Facility buried underground and resistant to attack
