

# Tiny GoPro for the action-shot connoisseur

GoPro has introduced the *Hero4 Session* camera – a tiny waterproof, light and rugged device that is much easier to mount and less obtrusive to wear

**Latch:**  
Releases camera from mount

**One button:**  
Simple on/off operation. App handles other functions

*Base jumper readies to leap, using four Hero4 Session cameras*

Helmet

Chest

Knee

Selfie stick

**Mount:**  
Ships with several varieties

**Video** (H.264 codec, .mp4 file format)

| Modes       | Frames per second    | Resolution  | Field of view      |
|-------------|----------------------|-------------|--------------------|
| 1440p       | 30, 25               | 1920 x 1440 | Ultra wide         |
| 1080p (SV)* | 60, (48), 50, 30, 25 | 1920 x 1080 | Ultra wide, medium |
| 960p        | 60, 50, 30, 25       | 1280 x 960  | Ultra wide         |
| 720p (SV)   | 100, 60, 50, 30, 25  | 1280 x 720  | Ultra wide, medium |
| WVGA        | 120, 100             | 848 x 480   | Ultra wide         |

| Photo Fidelity | Field of view | Resolution  | Burst mode  |
|----------------|---------------|-------------|---|
| 8MP            | Wide          | 3264 x 2448 | Can capture up to 10 photos in one second for fast action shots |
| 5MP            | Medium        | 2720 x 2040 |   |

| Battery life range (rechargeable lithium-ion)  | Cost  | Weight |
|--|-------|--------|
| 2hrs 5mins (wi-fi off) – 1hr 35mins (wi-fi on) | \$400 | 74g    |

**Video/photo storage:** Up to 64GB capacity microSD card supported

\* (SV) = **SuperView** option. Captures tall perspective shot, then stretches out sides to fill 16:9, leaving centre of image unchanged. Particularly effective for head-mounted filming such as cycling or skiing
