

# Japan returns to nuclear energy

Japan is to restart the first of its fleet of mothballed nuclear reactors under a new safety regime introduced in the wake of the 2011 Fukushima accident. Some 24 out of Japan's 43 operable reactors have applied for restart permits

## REACTOR STATUS: As of July 23

- Approved for restart
- Awaiting approval to restart
- Restart permit not applied for
- Under construction
- Decommissioning

**Sendai** ●●  
Aug 14: No. 1 reactor to start generating power

## NET ELECTRICITY GENERATION BY FUEL

Natural gas 30%
