

Russia to deliver S-300 missiles to Iran

Russia is pushing ahead with a contract to supply Iran with advanced S-300 air defence missiles. The deal comes after Moscow halted an earlier agreement due to international sanctions against Tehran

S-300VM MISSILE SYSTEM

9A83ME
launcher unit
NATO
codename
SA-23A
Gladiator
Engages
aircraft,
cruise
missiles
and smaller
ballistic
missiles

Missile canisters
Four per launcher

Antenna
Transmits guidance commands to missile

Missile length	8.6m
Range	200km
Altitude	Up to 30km
Warhead	150kg
Speed	Mach 3.6+

TELAR*

9M83ME
missile

9S32ME guidance radar
Tracks targets provided by command post and controls
TELAR-mounted antenna

9A84ME launcher unit
NATO codename SA-23B Giant
Engages intermediate-range ballistic missiles, AWACS and jamming aircraft at ranges of up to 250km
