

Google to be 100% green by 2017

Google claims it will hit a target of offsetting 100% of the energy it uses in data centres and offices against power from renewable sources, by 2017

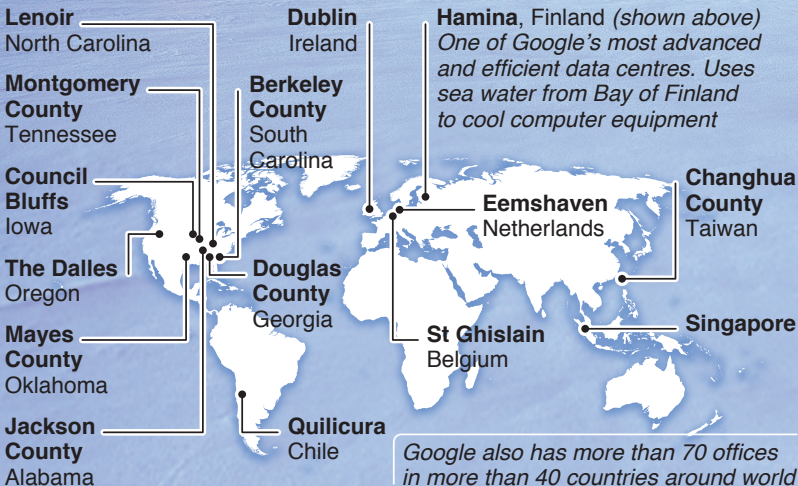

TOP CORPORATE RENEWABLE ENERGY PURCHASERS

(Cumulative U.S., Europe, Mexico – Nov 2016)

*includes 80MW project in Chile

GOOGLE DATA CENTRES

Google also has more than 70 offices in more than 40 countries around world
