

New gas pipeline to open in Poland

A new natural gas pipeline is being launched in Poland as part of the North-South Gas Corridor, which is planned to link liquefied natural gas (LNG) terminals in Poland and Croatia by 2022

Czeszów-Wierchowice pipeline: New 14km-long connection opening in September 2017. Forms part of Polish stretch of North-South Gas Corridor

Route of North-South Gas Corridor: Project aims to boost LNG market in central Europe and reduce reliance on Russian gas imports

— Major pipelines carrying Russian gas ■ LNG terminals
