

# U.S. states at risk from trade war

Steel and aluminium users, farming, electronics and car makers face increased expenses and potential losses of as many as 2.6 million\* jobs from President Trump's Sino-U.S. trade war

U.S.-China trade (goods, year to April 2018)

**\$653.97 billion**

**\$132.9bn**

**\$521.0bn**

U.S. trade deficit  
with China: **\$388.05bn**

## Agriculture

*\*U.S. Chamber of Commerce estimate*

**Illinois, Iowa and Minnesota:** In 2017, 60% of U.S. soybean exports – 35 million tonnes worth **\$14.4bn** – went to China. Prices have fallen **8%** since tariffs announced

**Nebraska, Colorado:** China is tenth largest U.S. beef export market after 15-year ban following mad-cow disease

## Chemicals

China is third-biggest export market for U.S. chemicals behind Canada and Mexico, worth **\$10.6bn**

## Automotive

**Michigan:** In 2017 Ford earned **\$1.5bn** and General Motors had revenues of some **\$56bn** from cars built in China

## Aviation

**Washington:** Exports of **\$41.8bn** worth of planes and parts last year

**Kansas, Maryland:** Lesser-known aviation states also at risk

## Electronics

**California, North Carolina, Oregon:** China is top destination for **\$29.9bn** of chips and semiconductors from Qualcomm, Qorvo and Intel

## Steel and aluminium

**Alabama, Illinois, Indiana, Michigan, Ohio, Pennsylvania:** Tariffs have boosted steel prices almost **38%** but threaten nearly 470,000 jobs
