

Robot revolution

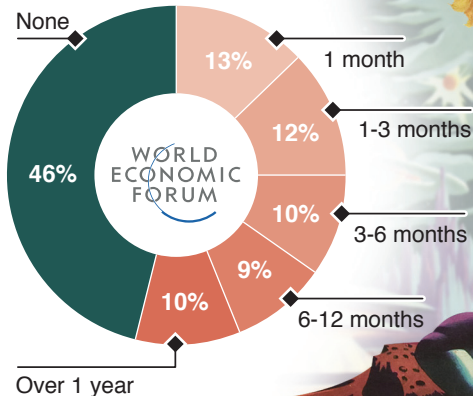

More than half of all workplace tasks will be carried out by machines by 2025, predicts the *World Economic Forum* in a new report

PROJECTED RATIO CHANGE OF HUMAN-TO-MACHINE WORKING HOURS (%)

	Human	Machine	Human	Machine
Reasoning/decision-making		19		28
Developing/managing/advising		19		29
Communicating/interacting		23		31
Administration		28		44
Physical/manual work		31		44
Identifying/evaluating information		29		46
Complex technical activities		34		46
Looking for/receiving information		36		55
Information/data processing		47		62

By 2022, roughly **75m** jobs worldwide could be lost, but that could be more than offset by creation of **133m** new jobs adapted to increased machine labour

EXPECTED AVERAGE RETRAINING NEEDS ACROSS COMPANIES (by share of employees, 2018-2022))

2018

2022
