

End of the road for Opportunity rover

NASA has called time on its Opportunity Mars rover as the robot has not contacted Earth since June 2018, when it was engulfed in a dust storm

Jan 25, 2004:
Opportunity lands.
Mission planned
to last 90 sols
(Martian days)

Eagle Crater

Victoria Crater

**Meridiani
Planum**

Rover
landing
site

During its lifespan
Opportunity travelled
45.16km and lasted
55 times longer
than intended

5km
3 miles

**Manhattan
to scale**

**Endeavour
Crater**

**Mar 24, 2015
(Sol 3,968):**
Rover reaches
42.20km –
distance of
Olympic
marathon

**Jun 10, 2018
(Sol 5,111):**
Contact with
Opportunity lost
during planet-wide
dust storm

Feb 13, 2019:
NASA declares
mission complete

Solar panels believed to be
covered in dust and unable
to generate power to operate
