

Who is most at risk from the coronavirus?

People aged over 60 and those with pre-existing medical conditions appear to be most at risk from the coronavirus, according to the World Health Organisation

COVID-19 MORTALITY RATE: Based on 44,672 confirmed cases from China (as of Feb 11, 2020)

Age, years

Health condition

Sex

*Higher mortality rate may be explained by higher smoking rate among Chinese men
