

Germany's infection rate rises

Germany's coronavirus reproduction rate has remained above one for the third day in a row after falling to 0.83 on Friday. The rise follows a relaxation of lockdown measures across the country

Reproduction rate (*number of people that each infected person can infect*)

May 11, $R=1.07$: Number indicates that 100 infected people on average will spread disease to 107 others

$R>1$ could signal possible second wave of pandemic

Daily cases (*thousands*)
