

# Artificial window will mimic sunlight

Samsung Electronics is sponsoring development of the *SunnyFive* – a window-shaped lighting device that produces artificial sunlight

## SUNNYFIVE

**Display:** Hangs on wall to look like window

**Passage of time:** Light recreates sun's natural progress through sky, and can mimic effects of sunrise and sunset

**Window:** Changes hue throughout day

**Vitamin D:** Produced faster than exposure to natural sunlight

# SAMSUNG

## COMPANION APP

**Control:** Allows user to adjust colour temperature, brightness and angle of simulated sunlight

## SUN TRACKING

*Ideally suited to windowless bedrooms or bathrooms*
