

# Covid cases rise among U.S. children

As schools across the United States begin to welcome students back to class for the first time in months, recent data shows that Covid-19 infection is on the rise in children

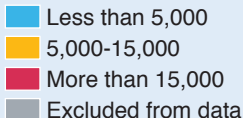

**CUMULATIVE CHILD CASES OF COVID-19 IN U.S. (Apr 23-Jul 30)**

**338,982**

**Jul 16-30: 97,078 new child cases reported – increase of 40 percent**

**CUMULATIVE CHILD CASES OF COVID-19 BY U.S. STATE (as of Jul 30)**

**Note:** Definition of child age range varies by state. Data for New York includes NYC only
