

# Access to coronavirus vaccines

Of the 50 or so countries that have begun administering coronavirus vaccines, all of them are high- or middle-income nations. Vast numbers of low-income countries have yet to begin their campaigns

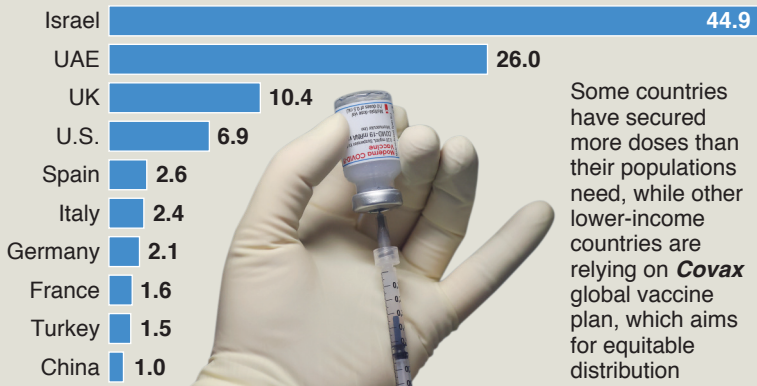

## TOTAL COVID-19 VACCINE DOSES\* (per 100 people)

As of Jan 25

## VACCINE DOSES BY POPULATION

(per 100 people, in 10 countries with most vaccinations)

Some countries have secured more doses than their populations need, while other lower-income countries are relying on **Covax** global vaccine plan, which aims for equitable distribution
