

WHO investigation into Covid-19 origins

A World Health Organisation-sponsored probe into the source of the coronavirus has been given full access to key sites and personnel in Wuhan, the Chinese city where Covid-19 was first detected in late 2019

LOCATIONS VISITED BY WHO INVESTIGATION TEAM

1 Jan 14, 2021: Team of 13 WHO experts required to isolate for 14 days upon arriving in Wuhan

1 Jan 30: Visit to **Hubei Provincial Hospital of Integrated Chinese and Western Medicine** – treated some of first known Covid-19 cases

2 Jan 30: **Jinyintan Hospital** – received large numbers of severe Covid-19 cases in early days of outbreak

3 Jan 31: **Baishazhou market** – one of Wuhan's largest food wholesale markets

4 Jan 31: **Huanan seafood market** – site linked to early cluster of Covid-19 cases

5 Feb 1: **Wuhan Centre for Disease Control and Prevention (CDC)** and **Hubei Provincial CDC**

6 Feb 2: **Hubei Animal Epidemic Disease Prevention and Control Centre**

7 Feb 3: **Wuhan Institute of Virology** – members of WHO team have refuted speculation that virus leaked from laboratory studying bat-borne coronaviruses
