**1.3°C (2015 Paris  
Agreement target)**

# COP26: Projected global emissions

The conference aims to address man-made global warming to avert a climate catastrophe. If current practices are not radically altered soon, global temperatures could rise up to 3.1°C above pre-industrial levels by 2100

**EMISSIONS AND EXPECTED WARMING BASED ON PLEDGES AND CURRENT POLICIES**

**Global greenhouse gas emissions – GtCO<sub>2</sub>e/year (Gigatonnes of CO<sub>2</sub> equivalent)**
