

Top scientists anxious about climate

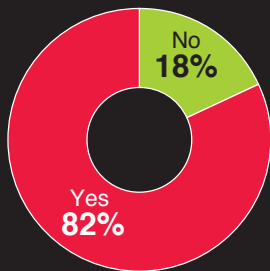

Nearly two thirds of respondents to a Nature survey of leading climate scientists are sceptical that nations can rein in global warming and expect the world to warm by at least 3°C by the end of the century

HOW MUCH WARMING DO YOU THINK IS LIKELY BY 2100?

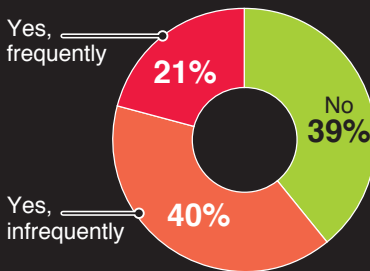

Degrees Celsius,
relative to pre-industrial times

DO YOU THINK YOU WILL SEE
CATASTROPHIC IMPACTS OF
CLIMATE CHANGE IN
YOUR LIFETIME?

DO YOU EXPERIENCE ANXIETY,
GRIEF OR OTHER DISTRESS
BECAUSE OF CONCERNS
OVER CLIMATE CHANGE?

Anonymous survey of 233 living authors of August 2021 IPCC climate-science report.
October survey received responses from 92 scientists — about 40% of group

*Includes 2 responses between 2.7C and 2.75C
