

Afghanistan faces starvation crisis

An estimated 22.8 million people, or 55 percent of Afghanistan's population, face crisis or emergency levels of food insecurity due to prolonged drought, conflict and economic collapse

IPC: Integrated Food Security Phase

Classification (Nov 2021-Mar 2022)

Phase 1: Minimal

Phase 3: Crisis

Phase 5: Famine

Phase 2: Stressed

Phase 4: Emergency
