

UK's Northern Ireland Protocol Bill

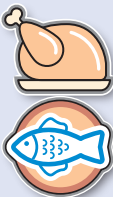

1 Under Brexit deal: EU law on customs and goods is applied at ports in Northern Ireland (NI)

2 Goods “at risk” of entering EU: EU tariff applied to NI trader receiving goods from UK. If goods stay in NI, UK can refund trader. No refund if goods move to Ireland

3 New plan: Goods destined only for NI go into **Green Lane** and are not checked. Goods destined for Ireland-EU go into **Red Lane** and checks are carried out

Agri-food: Exports of plants and food to NI are controlled by **Trusted Trader** scheme – although there may still be some limited checks on live animals

State aid: Bill will remove NI from EU's state aid regime and bring it fully under UK subsidy control

Regulation: Bill removes jurisdiction of **European Court of Justice** – key priority for UK throughout Brexit process

European Commission: Insists ECJ must have role where EU law applies

Jun 15: Commission launches infringement proceedings against UK for not complying with significant parts of Northern Ireland Protocol
