

Global wildfires wreak havoc

Scientists believe climate change is to blame for multiple wildfires that are causing widespread destruction around the world

WORLD ON FIRE (blazes larger than 400 hectares)

Gironde, FRANCE

Area burned:
19,303 hectares (ha)

Many regions including **Galicia, León, Castile, Zamora, Zaragoza, Malaga, SPAIN**
193,247 ha

Murcia, Ourém, PORTUGAL

13,000-15,000 ha

Tuscany, Carso, ITALY

2,673 ha

Peloponnese, Megara, Salamina, Athens, Lesbos, GREECE
1,700 ha (Lesbos)

Mugla, TURKEY
728 ha

Corrientes, ARGENTINA
900,000 ha

Lytton, British Columbia, CANADA
809 ha

Tetouane, Larache, Ouezzane, Taza, MOROCCO
2,023 ha

Flagstaff, Arizona, U.S.
8,093 ha

Ulljin, SOUTH KOREA
17,000 ha

Big Sur, California, U.S.
607 ha

Mariposa Grove, near Yosemite National Park, California, U.S.
8,503 ha

Santa Fe, San Miguel, New Mexico, U.S.
138,295 ha
