

# Amazon's Zoox robotaxi

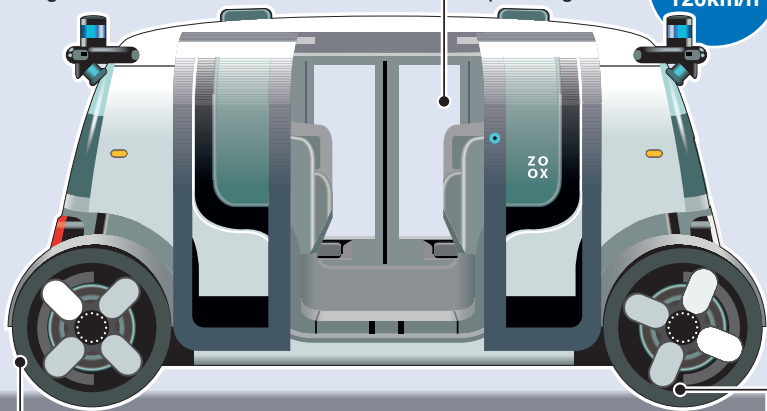

Amazon's Zoox robotaxi has made successful tests on public roads in California with passengers on board. The self-driving vehicle does not require a safety driver

**Zoox robotaxi:** No steering wheel or pedals

**Bidirectional driving:** Enables vehicle to change directions without need to reverse

**Cabin:** Four passengers

**Speed:**  
Up to  
120km/h

**Four-wheel steering:** Allows vehicle to pull into tight curb spaces without parallel parking

Twin batteries provide 133kWh to two separate powertrains

**Wheels:** Anti-lock brake system with electronic control of each wheel's suspension

**Regenerative braking:** Charges batteries

ZOOX

**Rider protection:** Five individual airbag systems deploy in event of collision
