

# How many Chinese died from Covid?

China claims that 83,150 of its citizens have died since the Covid-19 pandemic began in late December 2019, but epidemiologists believe the total is far higher

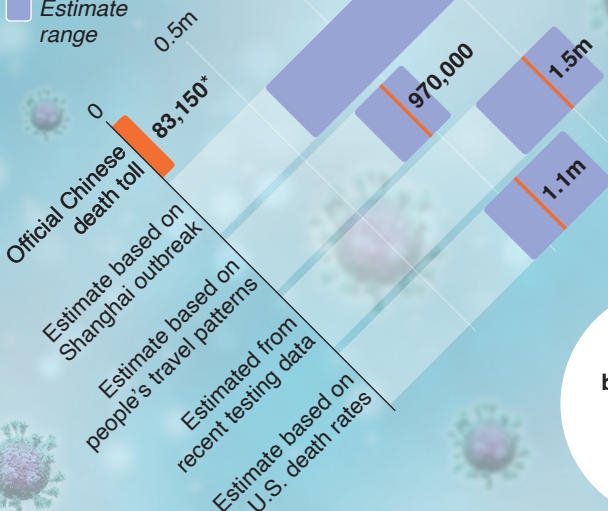

## DEATH RATE COMPARISON (deaths per 100,000 people since 2020)

China only counts deaths in hospitals and, until recently, only deaths caused by respiratory failure – discounting other causes such as liver, kidney or cardiac failure

## ESTIMATES FROM FOUR SEPARATE ACADEMIC TEAMS

Estimate range

Estimates suggest that between 1 and 1.5 million Chinese people died
