

# Wind and solar break energy records

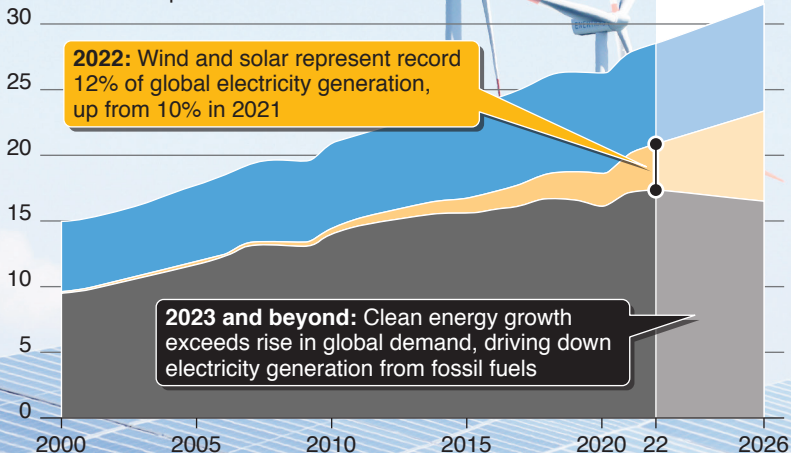

Wind and solar power produced a record amount of the world's electricity in 2022, according to a study by energy analysts Ember

## GLOBAL ELECTRICITY GENERATION

Terawatt-hours (TWh, 000s)

■ Fossil fuels ■ Wind and solar

■ Other renewable energy sources and nuclear power

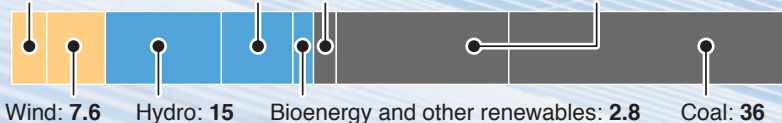

## GLOBAL ELECTRICITY GENERATION MIX, 2022 (%)

Solar: 4.5

Nuclear: 9.1

Other fossil fuels: 3

Fossil gas: 22

**Note:** Study looks at data from countries representing 93% of global electricity demand
