

# Ukraine's long-range drone threat

Ukraine has half a dozen or so models of long-range drones under development, including some that can fly more than 1,000km

Left: Ukrainian "Beaver" kamikaze drones have reportedly been used to attack Moscow

Estimated drone weight	150kg
Operating speed	120-200km/h
Range	700-1,000km
Maximum flight time	7 hours
Warhead weight	20kg
