

Homes destroyed as lava hits Iceland town

Lava flowed into houses in the town of Grindavik after a volcano on the Reykjanes peninsula erupted for the second time in less than a month

Svartsengi volcanic system: Made up of fissures, cones and volcanic craters

Jan 14, 2024: Two new fissures open in second eruption

Main road into town cut off by lava flow

Lava flow
(approximate extent)

Grindavik:
Town of 4,000 people evacuated in November
