

Fairbuds repairable earphones

Fairphone, makers of repairable smartphones, have launched *Fairbuds* wireless earphones with replaceable batteries – an environmentally friendlier alternative to offerings from Apple and Samsung

Replaceable battery:
6-hour listening time

Fairbuds: Active noise cancelling titanium drivers. Can connect to multiple devices at once

Battery cover:
Rubber gasket

Protection:
Shielded against dust and liquid splashes (IP54 rating)

Charging case:
Designed to come apart easily for repair

USB-C port:
To charge case battery

How they look: Similar in size to *Samsung Galaxy Buds FE*

Replaceable battery:
500mAh cell supplies earbuds with up to 20 hours of recharge

Made from 30% recycled plastic

Access: Charging case can be opened for repair by removing single philips screw

Wireless earbuds from likes of *Apple (AirPods pictured)* and *Samsung* are fragile, easily lost and prone to battery failure – whereupon units are usually discarded due to extreme difficulty repairing them
