

Global workforce upskilling

PwC's latest "Hopes and Fears" survey* shows workers are embracing emerging technologies such as generative artificial intelligence (GenAI) and upskilling amid workplace uncertainty

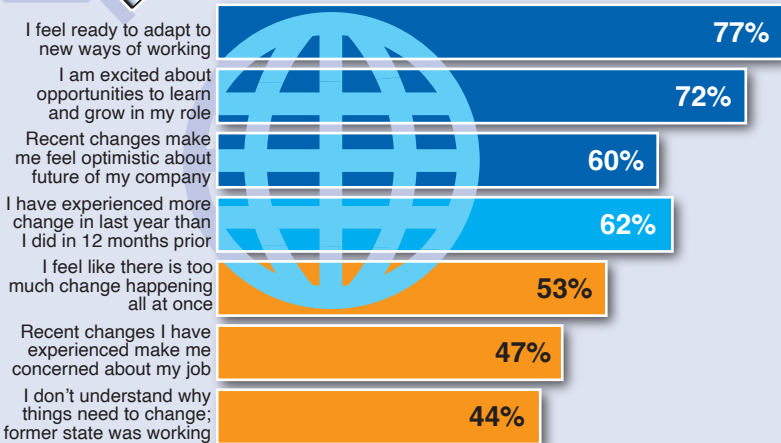

Question: Thinking about changes you have experienced in your role in the last 12 months to what extent do you agree or disagree with the following statements?

■ Positive feelings

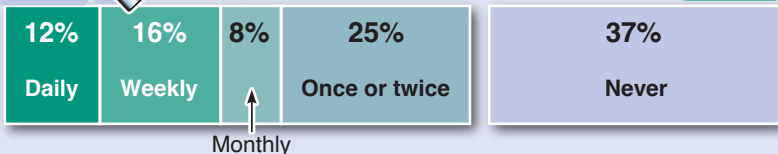

■ Neutral feelings

■ Negative feelings

Question: In the past 12 months, how frequently, if at all, have you used generative AI tools (eg ChatGPT, DALL-E) for work?

Note: Percentages shown may not total 100 due to rounding and omission of "don't know" responses

*PwC survey of more than 56,000 workers in 50 countries and regions
